EXTRA ABOUT ME

I love music as much as technology, working professionally as a clarinetist and teaching both clarinet and saxophone. I love sharing knowledge, which extends to managing a small technology laboratory in my town where I teach students how to approach technology. This taught me a lot and opened doors to speaking at numerous conferences about Open Source, as well as participating in challenging projects with universities and companies.

PROFILE

Fullstack developer specialized in Flutter, with a broad, hands-on background across web, mobile, data and game development. At my current job in Nexion I work over both web and mobile owning whole product sections and enforcing BLoC architecture. Over my 8 years of experience I have a strong track record of delivering results on key projects for international companies (Italy, England, Brazil, USA), I thrive on new challenges and adapt quickly to new stacks. I also run a small tech lab introducing students to Open Source.

EDUCATION

Master in Game Programming

Digital Bros Game Academy - Online, 2024-2025

Hands-on game development focused on Unreal Engine 5.

Bachelor's degree in Computer Engineering

POLITECNICO - Turin, 2015-2020

Graduated while working as a freelance developer.

WORK EXPERIENCE

Full Stack developer - Flutter

Jan 2026 - ongoing || Nexion

International manufacturer of tyre and wheel service equipment:

- Develop web/mobile portal, "WeNext", Nexion's cloud platform for connected Industry 4.0 equipment (IOT), covering every step of device management and user's daily workflows, from a single codebase.
- Build frontend with BLoC pattern, both extending existing code and defining whole new sections.
- Delivered results from individual components to whole pages, owning entire sections from UI to complex bloc-flow management and implementation.
- Worked on a C++ gateway for industry 4.0 features, with secure TLS communication using OpenSSL.
- Contributed to project planning and steady progresses across the team, through peer support and open discussions.

QA engineer

2021 - 2024 || Voxy (Previously Fluentify UK LTD)

International company specialized in teaching languages online:

- Handled bug fixing across multiple systems and improving code quality as well as enhancing system performances on a very large codebase, coordinating team tasks and deadlines with Jira and Agile methods.
- Developed internal automation tools and automated pre/post release QA Checks, defining reliable deployment policies.
- Worked extensively with data management, building data warehouse reports and analysis with BigQuery dashboards.
- Dealt with AWS services for various tasks, enhancing cloud-based solutions and deployments.

Full Stack web developer

2017 - ongoing || Acris SRL

Italian fintech company specializing in credit risk assessment:

- Development of a full-scale IT system covering all steps of the client business.
- Implemented data-driven solutions to optimize financial decision-making.
- Handle Data analysis, visualization and management.

Mobile Developer - Flutter

2021-2022 || Consorzio Copernico SCS

From-scratch development of cross-platform solution for surplus food management tailored for Caritas (Italian charity associations):

- Cross platform app (iOS + Android + Web) in Flutter.
- Full backend implementation with RESTful API on a LAMP stack.
- Published, has been used by a lot of local charities and shops.
